With little effort, you can increase profits while providing high quality care

Sleep apnea affects more than 25% of all U.S. adults, ages 30 to 70. It is at the core of most chronic conditions, including diabetes, heart disease, obesity, digestive disorders, depression, Alzheimer's and immune system disorders.

Now REMware, the best-in-care sleep solutions company, offers DreamClear. DreamClear is the turnkey home sleep apnea testing program that makes the entire process easy for providers and their patients.

✔ **Immediate Revenue**. Easily make $5,000+ a month based on test volume/reimbursement contracts

✔ **Ease of Use.** You write the script and we handle the details, end-to-end if desired

✔ **All patients benefit** from the most advanced home sleep testing program available
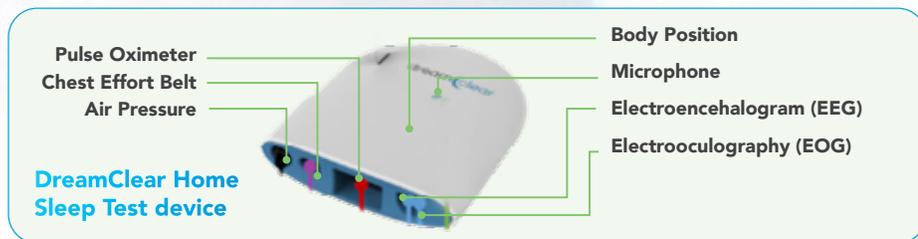

How It Works

1. PRESCRIPTION Provider **sends referral for home study** through our web portal

2. TEST KIT DELIVERY REMware **sends testing equipment** to patient's home.

3. TESTING Patient **downloads mobile app** (IOS or Android) and conducts tests at home. Patient help line available 9 pm to 6 am Tuesday through Saturday.

Pulse Oximeter
Chest Effort Belt
Air Pressure

Body Position
Microphone
Electroencehalogram (EEG)
Electrooculography (EOG)

DreamClear Home Sleep Test device

5. INTERPRETATION DreamClear immediately scores, interprets (if desired) and provides **results to provider.** Provider bills patient's insurance.

4. DATA TRANSFER 30 minutes after awakening, patient data from test sensors **streams** via mobile app (wifi or LTE) to cloud storage

6. FOLLOW-UP CARE The provider can provide as much or as little follow-up care as desired. REMware can **oversee everything** from sleep specialist consult to DME oversight.

A dozen facts you need to know about DreamClear

Ease of Use

1 This all-inclusive model means your clinic staff never has to handle equipment, ship it, or download data.

2 You can conduct the test over two nights using the one set of AA batteries shipped out with the DreamClear unit.

Immediate Revenue

3 The test can be billed as a Type 3 or Type 2 device depending on which sensors are utilized.

4 Billing codes are G0399, 95806, 95800, or G0398 (Type 2 on average reimburses more per night).

5 Throughput home sleep test volume for your practice will be higher per month because staff does not need to wait for device to be shipped back by patient to have access to data.

Safe

6 Disposable supplies reduce risk of cross contamination.

Easy Scoring & Interpretation

7 Once the patient address and DOB are entered into DreamClear portal, the results are displayed in EDF format to be reviewed using existing sleep acquisition software.

8 Scoring by Ensodata is available for each night of testing.

9 Data is available the morning when the patient wakes up (typically within 30 minutes of them uploading data).

10 Interpretation can be conducted directly from any computer via our web portal.

11 Interpretation results can be pushed back directly on to the patient phone app if desired.

Convenience

12 The DreamClear call center is available to assist patients at night if they need any type of assistance, such as setting up the tests or have questions about the app.
